## UPDATED EXPLORATION TARGET FOR TRANSITION'S VANADIUM DISCOVERY

### Key Highlights

- Exploration Target is estimated from 2022 drilling at the Company's 100%-owned Barkly Zone, Northern Territory. Drilling intercepts on which the Target is based are documented in release to shareholders dated 10 November 2022. Drilling data are disclosed in Appendix 1.
- Drilling data indicate vanadium mineralisation from surface and in sub-horizontal strata hosted within saprolitic clays.
- Mineralisation is open in all directions.
- At Vanadis, the vanadium mineralisation occurs a few metres above the rare earth elements (REE)-enriched zone, creating a 'combination project' of two sub-horizontal horizons of parallel mineralisation that contribute to economic prospectivity.

### Barkly V Exploration Target

Further to the Company's announcement on January 4<sup>th</sup> of its determination of an Exploration Target for rare earth elements at its Barkly Zone, Northern Territory (Transition Minerals 100%), the Company is pleased to announce determination of an additional Exploration Target for vanadium in a zone overlying the rare earth target following 2022 drilling (Figure 1).

*Figure 1: Drilling at Vanadis.*

The Exploration Target (Table 1) of 10–50 million tonnes at 0.16–0.2% V<sub>2</sub>O<sub>5</sub> (vanadium pentoxide) is reported in accordance with the JORC Code (2012) and has been determined by a Competent Person.

The potential quantity and grade of the Exploration Target is conceptual in nature; there has been insufficient exploration to estimate a Mineral Resource and it is uncertain if further exploration will result in the estimation of a Mineral Resource.

*Table 1: Barkly Exploration Target*

| Category           | Million Tonnes | V <sub>2</sub> O <sub>5</sub> % |
|--------------------|----------------|---------------------------------|
| Exploration Target | 10–50          | 0.16–0.20                       |

The Company has commenced mineralogical investigation utilising RSC's scanning electron microscope and geochemical expertise. This is intended to support continued test work towards developing a process flow sheet for potential economic recovery of the vanadium. This preliminary mineralogical assessment is anticipated to conclude early in 2023, with metallurgical test work anticipated to continue through 2023.

Notably, both the vanadium and the underlying REE mineralisation is open in all directions. At Vanadis, the sub-horizontal vanadium mineralisation occurs 2–4 m above the REE-enriched horizon (Figure 2, Figure 3 and Figure 4). The Company is now working to understand the controls on mineralisation better, to help with the next stage of exploration.

Preliminary assessment of the *combined* potential for commercially feasible vanadium and REE extraction indicates that the project presents a unique opportunity to develop a future-facing minerals project. The project has excellent potential to contribute to Australia's green energy transition, and provide access to a reliable, secure, and resilient supply of multiple critical minerals.

The combination of *both* V and REE prospectivity, from surface, makes this a unique project in a safe jurisdiction at the pivotal time in the world's quest for a sustainable future.

## Next Steps

The Company has identified that the Barkly Project, encompassing 8,124 km<sup>2</sup> of granted tenure, has the potential to contain a large-scale, vanadium and high-grade clay-hosted REE combination project. The next steps include the following.

1. Initial mineralogical and metallurgical test work to commence the characterisation of REE and vanadium mineralisation, to ascertain the potential processing and recovery options of a rare earth element and vanadium product streams.
2. Consider a preliminary scoping exercise to determine possible V and REE extraction scenarios.
3. Pending results of the preliminary mineralogical and metallurgical testing, the Company will look to report a Mineral Resource Estimate in accordance with JORC (Q1 2023).
4. Given that the target is open in all directions, Transition is planning a significant drilling campaign to expand the initial resource (Q2-3 2023).
5. IPO is planned for 2023 pending favourable market conditions.

Transition Minerals will be seeking additional financial support to undertake these planned future works in the coming months.

## Competent Person Statement

The information in this presentation that relates to the Exploration Results and Exploration Target is based on information evaluated by René Sterk who is a Fellow of The Australasian Institute of Mining and Metallurgy (FAusIMM), who is a Chartered Professional with the AusIMM, a Registered Professional Geologist with the AIG, and holds an ex-officio position on the JORC committee. He has sufficient experience relevant to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code 2012). Mr Sterk is Chairperson of Transition Minerals Limited and he consents to the inclusion in this report of the information in the form and context in which it appears. Mr Sterk indirectly holds shares in Transition Minerals Limited, and is the main shareholder and managing director of RSC, the geological service company contracted to undertake the exploration work on behalf of Transition Minerals Limited.
